

Dear colleagues and friends,

as President of SEMOYM (Spanish Society of Manual Medicine) and co-Director of the SEMOYM - LATAM Training Days, together with Dr Stran, it is a pleasure for me to present and invite you to these Days.

This year the pandemic has prevented us from holding our Congress and regular courses in person, but SEMOYM decided not to miss the opportunity to continue medical education.

These sessions do not replace neither our Annual Congress nor our Advanced Course, because face-to-face training has no online equivalent. But it does seek two objectives: first, as I said before, to continue medical training in Manual Medicine; and second to open ourselves to the world, especially to South America (LATAM), which is one of the objectives of our Society in the near future.

As you can see in the program, we have the participation of top speakers of known international prestige, and we have included new topics that we consider of interest.

The conference has been built in two modules, each containing several videos. The first module will be realised on December 17<sup>th</sup> and the second one on January 21<sup>st</sup> and will be open to attendance for a month from the date of publication. There will be an exam after completion of each module. European accreditation (EACCME) is requested.

From SEMOYM we hope that you find the program attractive and useful for your daily practice and that you participate and enjoy it as much as we have done organizing it.

Kind regards,

Jaime González Sánchez

President of SEMOYM
